

Ensemble Business Software Level 3.71.150 Release Announcement

March 1, 2003

We are pleased to announce the release of Ensemble Business Software Level 3.71.150. In addition to routine program corrections, this release includes significant enhancements to our Distribution, Warehouse Management, Embellishment, and Manufacturing solutions. This release will be automatically shipped to all Level 3.71.140 accounts on current ClientFirst™ Product Support Plans.

Distribution Solution Enhancements

- **Time-Phased Availability Enhancements** - The Time-Phased Availability Report will now allow the operator to choose Available to Sell in addition to a rolling availability calculation. Available To Sell displays the lesser quantity if future availability falls lower than the rolling availability during the aging parameters. Additionally, sub totals for Row Label, Item Number and Grand Total have been added and the report may now be selected to print using a Product Line Range.
- **Inventory Availability Report** – This new report provides an enhanced Matrix Stock Status Report that allows the operator to apply Time Phased Options and displays available quantities in a more concise format.
- **NRF Codes by Item** – NRF Codes may now be maintained for Inventory Items. NRF codes added to Inventory Items will override NRF codes assigned in Color/Size Code Maintenance.
- **Sales Order Entry Enhancements** – Sales Order Entry now includes reminders for Sales Order Entry and Delete when an order is included in an Allocation Selection, has an active Picking Sheet or Picking Sheets are being printed, allowing the operator to determine whether or not modifications should be made to the order. A Number of Packages field has been added to Sales Order Totals and Invoice Totals. This field may be added to Crystal Invoice Forms and reports. A default Season Code may be defined and the Open Sales Order Report will print with the Order Number Range defined in the Header. An option for a shortcut to Customer Item Price Maintenance has been added to the Sales Order Line Special Options Button.

Embellishment Solution Enhancements

- **Sales Order, Purchase Order and Inventory Maintenance Data Entry** – An Art button is available in Sales Order and Purchase Order Line Entry allowing operators to add Artwork Numbers to Inventory Items during Order Entry. Artwork Codes may also be added to Inventory Items which will default during Sales Order or Purchase Order Entry. Additionally, Purchase Order Automatic Reorder Selection, Receipt of Goods Entry and Receipt of Invoice Entry have been enhanced to include Artwork.

Warehouse Management Solution Enhancements

- **Picking Sheet Printing Enhancements** – A Master Pick Sheet option has been added to Finished Goods Allocation Setup Options allowing you to print a combined picking sheet by customer purchase order number. The Date and Time Stamp have been added to the Picking Sheet Printing Form.

Manufacturing Solution Enhancements

- **Bill of Materials** - Bill of Materials now supports Matrix Type Bills and Matrix Type Components for Bill of Materials Maintenance, Picking Sheet Printing (Crystal only), Production Entry, and Production Entry Update.
- **Work Order Documents** – Work Order Traveler and Picking Sheet Printing may be configured for Auto Print.
