Ensemble Business Software Announces Sage MAS 90 Work Order Compatibility

Beavercreek, Oregon – May 11, 2006 – Ensemble Business Software, a provider of ERP solutions for the apparel and footwear market, today announced compatibility with Sage Software’s MAS 90 and MAS 200 Work Order module. This new module allows apparel and footwear producers to issue work orders, generate cut sheets, develop schedules, track costs and maintain complete control of the manufacturing process. Providing complete control over the manufacturing process and the ability to see up-to-the-minute, work-in-process information, Work Order is equally well-suited for companies engaged in make-to-order and make-to-inventory processing. Used in conjunction with Bill of Materials, all of the required paperwork to move the job through the shop can then be generated from each work order, including cut sheets, travelers, dispatch sheets and operation tickets.

About Ensemble Business Software

Founded in 1987, Ensemble Business Software, Inc. is a Sage Software Authorized Partner dedicated exclusively to the apparel, footwear and soft goods market. Ensemble offers a coordinated line of solutions that feature seamless integration of industry specific features with the world class accounting functionality of MAS 90 and MAS 200 ERP Software. Ensemble works directly with clients throughout North America offering flexible and comprehensive solutions that may be configured for distribution, importing, warehousing, supply chain management, e-Commerce, electronic data interchange (EDI), manufacturing, screen printing and embroidery. For product information contact an Ensemble Sales Consultant at 503-632-1820 Ext. 1828 or visit www.ensembleware.com.
